

Unyun

Grocery Items Price Tracking App

The Unyun App

The Unyun app is an app for personal grocery item price tracking. Not every grocery store lists their prices online, e.g., Korean supermarkets, and some have different special deals every week. A lot of grocery shoppers also shop at multiple grocery stores in rotation, and might want to record prices of the same grocery item for them to compare between stores. The Unyun app is a digital notebook for keeping all those prices readily accessible while shopping.
